

Regional School District 13
Board of Education
Buildings & Grounds and Transportation Committee
Minutes of the meeting of Wednesday, November 14, 2012

Committee members present: Jeremy Renninghoff

Administrators present: Mrs. Viccaro, Mr. Francis

Other Board members present: Mrs. Flanagan, Mrs. Buckheit, Ms. Parsons

Since a quorum was not to be had, no official business was conducted. The Committee toured the high school starting around 6:05pm and concluding at 7:25pm. Some of the highlights...

- ⤴ IA shops: discussion of woodworking equipment acquisitions and funding sources
- ⤴ Art and pottery rooms
- ⤴ Mechanical room in 1976 IA wing: one of the water heaters has failed, but both will be replaced with smaller units better sized for the actual DHW loads.
- ⤴ Mechanical room in 1969 building near east stairs (old AHU 1): walked inside the return fan room and filter rack.
- ⤴ Science labs: note was made of the gas jets and the locks that will be installed to keep students from breaking off pencils inside the jets. The handles on the faucets will be replaced with knobs so students can't lean on them and damage the valves.
- ⤴ Main office/guidance. Mrs. Viccaro indicated the file room in the guidance office was at capacity.
- ⤴ Home Economics/Child Development
- ⤴ Faculty lounge/lunch room
- ⤴ Boiler room
- ⤴ Kitchen: Mr. Francis updated the Committee on the project to replace the failing epoxy floor with quarry tile.
- ⤴ Stage
- ⤴ Gymnasium and locker rooms

The next school to be toured will be the Francis E. Korn School on 12th December. Everyone is invited to join us.

Jeremy Renninghoff
